

Water Authority of Jordan (WAJ)
Programme Management Unit (PMU)
EXPRESSION OF INTEREST

Project: Energy Saving Performance Based Service Contract for Investment, Management, Operation, Repair and Maintenance of:

- (Old) Khaw Pumping Station – Water Authority of Jordan – Zarqa Governorate

in WAJ Zarqa Water Administration.

The commercialisation and participation of Jordanian private sector companies in operation and management of water supply has been an important element of the MWI water sector strategy.

The Water Authority of Jordan under the Ministry of Water & Irrigation has developed a Micro PSP concept, which envisages the engagement of Jordanian and/or international private sector companies to take over investment, installation of equipment, training, operation and maintenance for water pumping stations in order to reduce energy consumption. With this so-called **Energy Contracting** approach, local expertise is used and built, dependency on foreign assistance reduced and long preparatory periods for macro PSP contracts considerably reduced.

WAJ invites interested Jordanian and international companies to send their expression of interest and participate at the orientation workshop, which envisages the presentation of the Micro-PSP concept to:

Improve the performance of a defined pumping station by developing and implementing measures (including investments) to reduce energy consumption and costs, optimise the use of available water resources, manage operation & maintenance of the pumping station and improve professional expertise of involved WAJ staff

Prior to the submission of the expression of interest WAJ/PMU will present the Micro PSP concept and discuss the Micro PSP scope of work with interested companies on 28/07/2010 at 10.00 am at the Kempinski Hotel in Amman, Shmeissani.

After the Orientation Workshop interested companies are invited to send their expression of interest until the 29/08/2010 from which WAJ/PMU will select qualified companies to participate in the tendering process.

Interested companies are invited to submit at the minimum the following information:

1. Company profile
2. Main business fields
3. Experience in Energy Service Performance Contracting
4. Experience in operation and maintenance of pumping related activities
5. Staff composition and expertise
6. Financial statements

Based on the above deliverables and the evaluation criteria, the highest Respondents will be invited to participate at the tendering process.

Expression of Interest including the requested information should be sent not later than 05/08/2010

to:

HE Secretary General WAJ
Eng. Munir Oweis
P.O. Box 2412, Amman 11183

Note: Expression of interest's envelopes shall be deposited in the tender box WAJ building 1st floor, for queries please contact Eng Mohammed Sallam at + 962 (0) 779902743
